NTE 217 - Sustainability in the Aviation Industry				
Course Code	Course Name			Semester
NTE 217	Sustainability in the Aviation Industry			Fall <input type="checkbox"/> Spring <input checked="" type="checkbox"/> Summer <input type="checkbox"/>
Hours			Credit	ECTS
Theory	Practice	Lab	3	3
3	0	0		

Course Details	
Department	Aerospace Engineering
Course Language	English
Course Level	Undergraduate <input checked="" type="checkbox"/> Graduate <input type="checkbox"/>
Mode of Delivery	Face to Face <input checked="" type="checkbox"/> Online <input type="checkbox"/> Hybrid <input type="checkbox"/>
Course Type	Compulsory <input type="checkbox"/> Elective <input checked="" type="checkbox"/>
Course Objectives	<p>To provide a comprehensive understanding of sustainability concepts and their applications in the aviation industry.</p> <p>To analyze the economic, social, and environmental dimensions of sustainability within the aviation sector.</p> <p>To explore international trends and best practices in sustainable aviation, with a focus on leading global firms.</p> <p>To assess the historical development and current status of the Turkish aviation industry, including its challenges in achieving sustainability.</p> <p>To investigate the role of localization, nationalization, and government policies in promoting sustainability within the aviation industry.</p> <p>To develop critical thinking and problem-solving skills for proposing innovative strategies to enhance the sustainability of the aviation industry in Turkey and globally.</p>

Weekly Schedule		
No	Topics	Materials/Notes
1	Definition and History of Sustainability	
2	The Importance of Localization and Nationalization in Sustainability	
3	Dimensions of Sustainability	Economic Dimension of Sustainability Social Dimension of Sustainability Environmental Dimension of Sustainability
4	International Aviation Industry: A Sectoral Analysis of Global Aircraft Production	
5	Sustainability in the International Aviation Industry	
6	Aviation Companies Leading Sustainability Worldwide	
7	Historical Development of the Turkish Aviation Industry: Analysis of Factories Established and Reasons for Their Lack of Sustainability	
8	Midterm Exam	
9	International Sustainability Factors in the Turkish Aviation Industry: R&D and Innovation	
10	International Sustainability Factors in the Turkish Aviation Industry: Sectoral Ecosystem and Companies, Financial Architecture	
11	International Sustainability Factors in the Turkish Aviation Industry: Market Structure, Business Models, Human Resources, Image and Impact, Government Policies	
12	The Importance of Government Policies in Sustainability	
13	Analysis of Turkey's Sustainability Strategy and Policy	
14	The Importance of Localization and Nationalization in Sustainability	
15	Suggestions and Opinions on the Sustainability of the Turkish Aviation Industry	
16	Final Exam

Project			
Report			
Midterm Exam and Preparation for Midterm	1	10	10
Final Exam and Preparation for Final Exam	1	20	20
Total Workload			72
Total Workload / 25			2,90
ECTS Credit			3

Course Learning Outcomes

No	Outcome
L1	Understand the fundamental principles and dimensions of sustainability (economic, social, and environmental) and their relevance to the aviation industry.
L2	Analyze the role of localization and nationalization in promoting sustainability within the aviation sector.
L3	Evaluate the sustainability practices of leading global aviation companies and identify best practices.
L4	Conduct sectoral analysis of global aircraft production, focusing on sustainability challenges and opportunities.
L5	Critically assess the historical development of the Turkish aviation industry and identify factors affecting its sustainability.
L6	Explore the impact of R&D, innovation, and sectoral ecosystems on achieving sustainability in the aviation industry.
L7	Examine the influence of government policies and financial structures on sustainable aviation practices.
L8	Develop strategic proposals for enhancing the sustainability of the Turkish aviation industry, considering international trends and best practices.
L9	Apply critical thinking and problem-solving skills to address real-world sustainability challenges in the aviation sector.
L10	Demonstrate an understanding of Turkey's sustainability strategies and policies in the aviation industry and propose improvements.

Contribution of Course Learning Outcomes to Program Competencies/Outcomes

Contribution Level: 1: Very Slight, 2: Slight, 3: Moderate, 4: Significant, 5: Very Significant

	P1	P2	P3	P4	P5	P6	P7	P8	P9	P10	P11					Total
L1	4	3	2	2	2	3	3	4	4	5	5					37/55; 67%
L2	3	4	3	3	3	3	3	4	4	5	5					40/55; 72%
L3	3	3	3	3	3	4	4	4	4	5	5					41/55; 74%
L4	4	4	4	4	4	3	4	4	4	5	5					45/55; 82%
L5	4	4	4	3	3	3	4	5	4	5	5					44/55; 80%
L6	4	4	3	3	3	3	4	4	5	5	5					43/55; 78%
